QUESTION 1

What is a characteristic of traffic storm control behavior?

- A. Traffic storm control monitors incoming traffic levels over a 10-second traffic storm control interval.
- B. Traffic storm control cannot determine if the packet is unicast or broadcast.
- C. Traffic storm control drops all broadcast and multicast traffic if the combined traffic exceeds the level within the interval.
- D. Traffic storm control uses the Individual/Group bit in the packet source address to determine if the packet is unicast or broadcast.

Answer: C

QUESTION 2

```
Sysauthcontrol          Enabled
Dot1x Protocol Version    3

Dot1x Info for GigabitEthernet1/0/12
-----
PAE                      = AUTHENTICATOR
PortControl              = FORCE_AUTHORIZED
ControlDirection        = Both
HostMode                 = SINGLE_HOST
QuietPeriod              = 60
ServerTimeout            = 0
SuppTimeout              = 30
ReAuthMax                = 2
MaxReq                   = 2
TxPeriod                 = 30
```

Refer to the exhibit. Which command was used to display this output?

- A. show dot1x
- B. show dot1x all
- C. show dot1x all summary
- D. show dot1x interface gi1/0/12

Answer: B

QUESTION 3

Which policy represents a shared set of features or parameters that define the aspects of a

managed device that are likely to be similar to other managed devices in a deployment?

- A. group policy
- B. access control policy
- C. device management policy
- D. device management policy

Answer: C

QUESTION 4

What must the administrator implement to ensure that all devices are compliant before they are allowed on the network?

- A. Cisco Identity Services Engine and AnyConnect Posture module
- B. Cisco Identity Services Engine with PxGrid services enabled
- C. Cisco ASA firewall with Dynamic Access Policies configured
- D. Cisco Stealthwatch and Cisco Identity Services Engine integration

Answer: A

QUESTION 5

Under which two circumstances is a CoA issued? (Choose two.)

- A. An endpoint is profiled for the first time.
- B. An endpoint is deleted on the Identity Service Engine server.
- C. A new Identity Source Sequence is created and referenced in the authentication policy.
- D. A new authentication rule was added to the policy on the Policy Service node.
- E. A new Identity Service Engine server is added to the deployment with the Administration persona.

Answer: AB
